

Francesco Berto

Consultant - Logic and Formal Modeling

Francesco teaches Logic, Metaphysics, Philosophy of Mathematics, and Artificial Intelligence at the universities of Aberdeen, Venice, and Milan-San Raffaele. After his PhD he has had two postdocs (at the University of Padua and the Sorbonne), a Chaire d'Excellence fellowship at CNRS in Paris, where he has taught Ontology at the Ecole Normale Supérieure, fellowships at the Universities of Notre Dame (IN-USA) and Melbourne, and has been an Invited Professor at the Institut Wiener Kreis of the University of Vienna. He is currently a member of Crispin Wright's Northern Institute of Philosophy.

He has written papers for American Philosophical Quarterly, Dialectica, Philosophical Studies, The Philosophical Quarterly, the Australasian Journal of Philosophy, the European Journal of Philosophy, Philosophia Mathematica, Logique et Analyse, Metaphysica, and runs the entries "Dialetheism" and "Impossible Worlds" of the Stanford Encyclopedia of Philosophy. He has also written a bunch of books on the philosophy of this or that: *La dialettica della struttura originaria* (Poligrafo 2003), *Che cos'è la dialettica hegeliana?* (Poligrafo 2005), *Teorie dell'assurdo* (Carocci 2006, 2007 Castiglioncello prize for the best book by a young philosopher, English, expanded ed. *How to Sell a Contradiction*, King's College Publications, London 2007), *Logica da zero a Gödel* (Laterza 2007), *Tutti pazzi per Gödel* (Laterza 2008, English ed. *There's Something About Gödel*, Blackwell 2009), *L'esistenza non è logica* (Laterza, forthcoming 2010).

Franz is iLabs consultant for Logical modelling, happily developing the philosophy and mathematics of the Models of Reference, and willing to help the world understand the aims of iLabs.
